Get back to **life** faster from the comfort of home

What does the PortableConnect® do?

- Delivers 3-5 at-home therapy sessions per day
- Engages patients in their recoveries
- Measures and records patient progress
- Monitors compliance
- Reports objective proof of patient progress
- Telemedicine capable

PortableConnect®

- ✓ Faster recoveries
- ✓ Better patient outcomes
- ✓ Lower cost of care
- ✓ Easy to prescribe & covered by insurance

Proudly made in the USA

Features

Pedal radius automatically adjusts to patients' current range of motion for immediate post-op rehab and frequent therapy sessions using passive, active-assisted, active, and resistive modes.

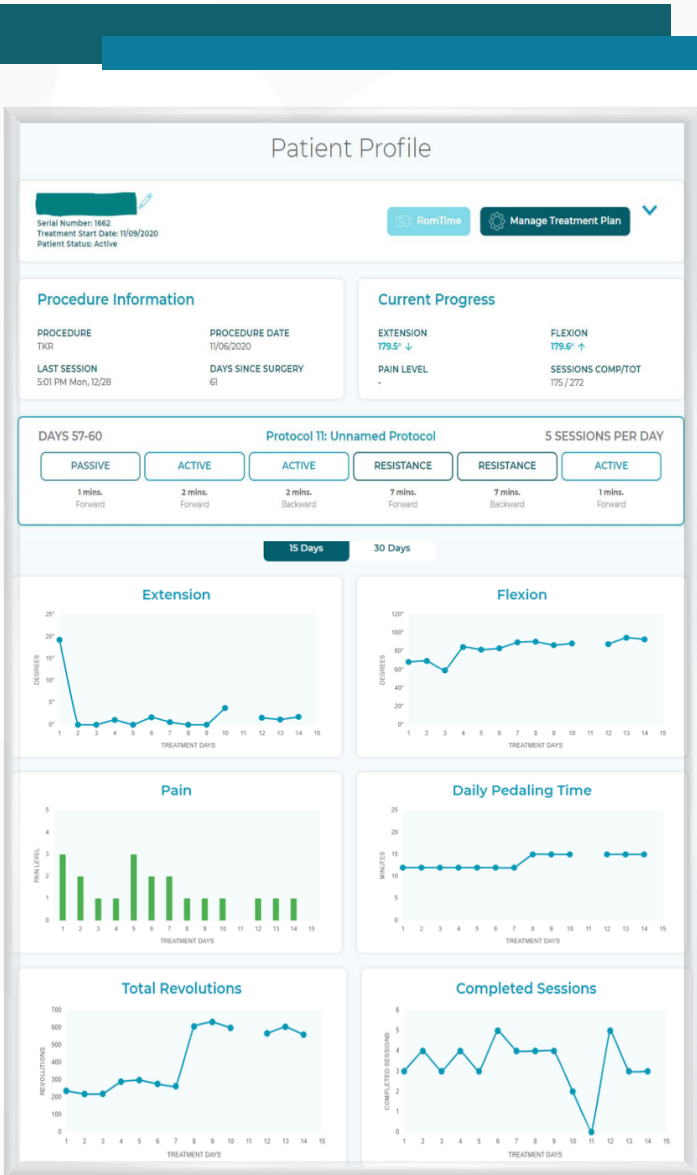

The AccuAngle® measures knee extension & flexion, reporting data to the patient app in real time

The patient app facilitates multiple daily therapy sessions with regular clinical check-ins and health questionnaires that pushes data to clinicians for remote clinical supervision. Its easy to follow step-by-step visual and audio instructions walk patients through at-home therapy sessions.

Patient Profile

Data is displayed on patient progress charts so your surgeon can track your improvements for real-time progress monitoring. Clinicians can access these reports at any time through the patient portal (as shown below).

Pilot Studies Have Shown

| | Standard Care | PortableConnect Patients |
|--------------------|---------------|--------------------------|
| Pre-Op Avg. ROM | 110° | 111° |
| Avg. ROM at Week 2 | 99° | 112° |
| Δ ROM at Week 2 | -11° | +1° |
| Avg. ROM at Week 4 | 115° | 117° |

13% Patients receiving standard care had recovered by week 2 vs.

50% PortableConnect® patients had recovered by week 2

80% PortableConnect® patients reported no pain to mild pain by week 2

0% PortableConnect® patients lost extension in post-op

Patients are Reporting

- 1 Less pain & reduced narcotic usage- some report they use the PortableConnect® to "treat" pain
- 2 Faster return of range of motion & increased patient satisfaction
- 3 Less swelling
- 4 Significantly improved PT compliance due to ease of use, convenience, and accountability
